

# Amazon Sustainability Report

## Year in Review

As we reflect on 2025, we are proud of our achievements. We have continued to strengthen our environmental practices, enhance our value chain, support our employees and communities, and foster a safer, more inclusive workplace.

### 1.14

Global Power Usage Effectiveness for our data centers, better than the public cloud industry average of 1.25 and on-premises enterprise data center average of 1.63

### 0.12

L/kWh global Water Use Effectiveness for our data centers, a 20% improvement from 2024, and approximately seven times more water-efficient than the industry average

### 712

Total carbon-free energy projects announced—including 80 new projects in 2025—representing 42 GW of carbon-free energy capacity

### 7%

Reduction in carbon emissions per shipped unit compared to 2024, and 39% reduction compared to 2019

### 5.4M

Metric tons of packaging materials avoided in North America and Europe since 2015

### 288M

Single-use plastic bags avoided by retrofitting automated packaging machines across North America, up from 134 million in 2024

### 835K

Devices traded in through Amazon Trade-In

### 5%

Reduction in waste per shipped unit compared to 2024

### 4.2M

Products recognized by certifications in the Climate Pledge Friendly program available for customers to purchase, up from over 2.2 million in 2024

### 72.6K

Hectares of land protected or restored through biodiversity- and nature-related contributions and investments by our Right Now Climate Fund since 2019, supporting 2,200 species, planting 2.6 million trees, and benefiting 2.4 million community members with increased access to nature

### 70%

Improvement in Lost Time Incident Rate (LTIR) among employees across our global operations over the past six years. LTIR includes any work-related injury that requires someone to take time away from work

### 43%

Improvement in Recordable Incident Rate (RIR) across our global operations over the past six years. RIR includes any work-related injury that requires more than basic first aid treatment

Nearly

### \$1.2B

Invested in incremental pay for our U.S. frontline operations employees

### \$348M

Contributed to support 3.1K community partners globally

Nearly

### 3.1K

Supplier audits, including Amazon-branded products, third-party labor, service, and not-for-resale goods providers across our logistics, warehousing, and construction supply chain

### 99M

Meals donated or delivered to households in need

### 2.4B

Packages delivered by electric delivery vehicles globally
